

Edmonton Boom Lift Ticket

Edmonton Boom Lift Ticket - Boom lifts are equipment that has a platform which can be lowered or raised to different heights, hence making this piece of machinery an important necessity in a wide variety of professions. Available in several specialized kinds such as aerial lifts, scissor lifts, and knuckle boom lifts, each model operates very specifically.

Aerial lifts are most regularly utilized to transport people at ski lodges who are not comfortable with a snowboard lift. These hoists operate much like an elevator, snowboarders can be slowly but surely shuffled up the mountain, stopping at stations along the way until they contact the top. Aerial platform lifts are also utilized in construction, transporting people securely up and down the sides of multi-level building sites.

Scissor lifts are also in the boom lift group. They are utilized regularly by utility companies as an idyllic system to permit staff to complete upkeep and repair on wires and cables that are attached to poles. Phone, cable and power companies have relied on the efficiency of this style of boom jack for years.

The knuckle boom jack is made for use within locations of uneven terrain and where the need to change direction could be required. This type of boom jack has the capability to fit in tight spots where a scissor jack cannot fit. Working among multiple machines in a manufacturing facility or in close proximity stuck between two walls, the knuckle boom also features a standard platform equipped with rails for security and employee safety.

The type of boom jack needed by organizations will sometimes depend on the nature of the work needed. Luckily, there are suitable models for almost any duty.
