Edmonton Telehandler Training Courses

Edmonton Telehandler Training Courses - The employer has the responsibility to make sure that their personnel are trained to work proficiently utilizing telehandler equipment. The workers need to be assessed for their skill to utilize the equipment. If deficiencies are found, employers need to provide training so that workers get the necessary level of skill. The responsibility level of the person must be taken into account when training is offered. Effective training will solve whichever deficiencies in the understanding, knowledge and skills of telehandler operators and supervisors. Training can be undertaken through in-house session or by engaging the services of an external training provider. An assessment upon finishing the training period will determine whether or not the learning objectives have been met.

Local, federal and state/provincial rules set out guidelines for basic telehandler operator testing and training. Basic training does not deal with such topics as the lifting of people, the lifting of suspended loads, utilizing different attachments, or the utilization of rotating machinery. Further training would need to be undertaken if such tasks are required on the work location.

Maintenance and Inspection
The telehandler requires routine maintenance similar to any other equipment. The machine will wear out eventually, so proper maintenance is needed to ensure the safe utilization of the telehandler equipment. Checks and inspections are essential to ongoing maintenance procedures. Operators need to have machine-specific training in order to monitor, prevent and rectify problems associated with damage, wear and deterioration. Staff need competence and experience in both breakdown and periodic maintenance. The preventive maintenance directions of the manufacturer must be seriously viewed and complied with, taking into account such factors as frequency of use and environmental conditions in the work setting.

The responsibility for making certain that the telehandler and its attachments are in good working order lies with both the user and owner of the machinery. Pre-use inspections are typically performed by the user, whereas general maintenance is normally performed by the telehandler owner.
